

Healthy Smiles, Inc.

Steele County Public Health

A non-profit serving children 0-14 years of age
in Steele County.

Your child could qualify for free dental services!

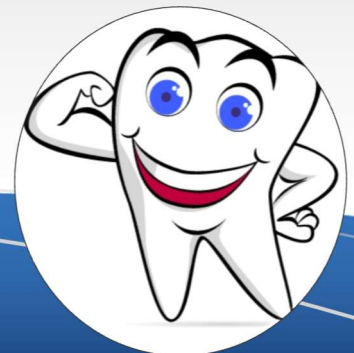

Services are available to children 14 and younger on Medical Assistance or those that have no insurance. Our preventative services will be performed and if there are any concerns a dental referral will be provided. Healthy Smiles has several dental offices that will accept patients once they have obtained a referral. Our patients, which otherwise may not be seen, can receive services 2-4x a year and will have an easier and faster track to a dentist if need be.

Our Goal

Our number one goal is prevention. Dental decay remains the number one preventable childhood disease in the nation. More than 40% of children have tooth decay before they enter kindergarten. The importance of providing education and preventative services at a young age cannot be overlooked.

Our Services

- Cleanings
- Oral Health Education
- Topical Fluoride Varnish
- Assessments
- Referrals (if needed)
